

SHAIK ARIF

Full Stack Developer and Machine Learning Enthusiast

+91-9603894297 shaikarif1801@gmail.com GitHub | LinkedIn India

SUMMARY

Computer Science (AI & DS) graduate with hands-on experience in full-stack web development and machine learning. Skilled in building scalable MERN stack applications and developing predictive machine learning models using Python. Strong understanding of data structures, algorithms, RESTful APIs, and database management with a passion for solving real-world problems through technology

EXPERIENCE

Full Stack Developer Intern

Trangla Innovations Pvt. Ltd

06/2025 - 11/2025 India

Internship focused on full-stack development

- Engineered modular, responsive UI components using React.js and Tailwind CSS, increasing code reusability and reducing development time for new features
- Engineered modular, responsive UI components using React.js and Tailwind CSS, increasing code reusability and accelerating development cycles for new features
- Built responsive web interfaces using CSS Flexbox, Grid, and Tailwind CSS
- Integrated REST APIs and handled asynchronous data fetching
- Improved application performance and user experience

Intern

SmartBridge Educational Services Pvt. Ltd

06/2024 - 12/2024 India

Virtual internship focused on machine learning

- Completed Long-Term Internship of 240-hours (6 months) on Machine Learning
- Built a liver disease prediction model using patient datasets
- Performed data preprocessing, training, and evaluation of ML models

EDUCATION

B.Tech in Computer Science (AI & DS)

Kallam Haranadhareddy Institute of Technology

08/2021 - 05/2025 India

Class XII

Narayana Junior College

04/2019 - 03/2021 India

Class X

Jain High School

04/2017 - 03/2019 India

TECHNICAL EXPERTISE

- Programming Languages: JavaScript (ES6+), Python, Java, HTML5, CSS3, SQL.
- Web Development: React.js, Node.js, Express.js, Tailwind CSS, RESTful APIs.
- Databases: MongoDB (NoSQL), MySQL.
- Machine Learning: Classification, Regression, Model Training, Data Preprocessing, Scikit-Learn.
- Core Fundamentals: Data Structures & Algorithms (DSA), Asynchronous Programming, Version Control (Git/GitHub)

PROJECTS

Rainfall Prediction System

12/2024 - 03/2025 GitHub

A project to predict rainfall using an ML model

- Built a predictive model using Gradient Boosting algorithms to forecast rainfall patterns, optimizing accuracy through rigorous data preprocessing and hyperparameter tuning
- Built frontend using HTML/CSS and backend using Flask
- Enabled real-time weather prediction system

Liver Disease Prediction System

06/2024 - 12/2024 GitHub

A machine learning application aimed at predicting liver disease

- Built an end-to-end ML application using Python, Scikit-learn, and Flask
- Designed a robust end-to-end ML pipeline including automated data preprocessing and model optimization, resulting in enhanced prediction reliability and model performance
- Created a web interface for real-time prediction

CERTIFICATIONS

MERN Stack Development
